13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On 06/25/2011 a BLM ranger discovered produced water being released on to the ground at the Big Field # 91S. The BLM notified our company of the spill. The well operator responded and shut down the well. We were unable to recover any water as it was very shallow and dried up quickly. Contaminated area consisted of approximately a twenty foot wide path from the wellhead to the west edge of the location. Water then ran off location into a narrow wash for approximately thirty yards. The water did not make contact with vegetation. The source of release was a loose polish rod liner. The well operator was on the location on 06/24/11 and found no problems. The volume of release is estimated at five barrels.

Remediation - Upon approval of sundry notice, Gypsum will be raked into contaminated area. (The spill was also reported to Brandon Powell with the NMOCD).

File an NMOC D Form C-141 for the release
