	<input type="checkbox"/> Altering Casing	<input type="checkbox"/> Water Shut off
		<input type="checkbox"/> Conversion to Injection

13. Describe Proposed or Completed Operations

Ran CBL on 7/9/11 after squeeze per NOI filed 7/6/11. CBL indicated squeeze job went as planned; TOC went from 5580' to 3840'. Notified Jim Lovato (BLM) and Brandon Powell (OCD) of results and requested permission to frac; well had trouble holding pressure and was leaking off into formation slowly. Believe leak is from previous squeeze job perforations at 5650'.

Burlington would like to proceed and perforate/frac Mesaverde and Lewis formations. Bottom perf @ 6024' in the Point Lookout formation; top perf @ 4540' in the Lewis formation. Jim Lovato and Brandon Powell concurred with the request asking for a Notice of Intent and a CBL. Brandon Powell also requested that we run a packer test prior to fracking to insure that the leak is not above the Lewis/Mesaverde formation.

14. I hereby certify that the foregoing is true and correct.
