13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Record clean up: The subject well's APD submitted on 9-26-1995 had the well location at 1305 feet FNL and 1815 feet FEL. Subsequently, a revised C-102 plat dated 11-02-1995 with revised footage of 1275 feet FNL and 1815 feet FEL was filed without a sundry notice. The north 1275 footage was not reflected on all of the subsequent well record documents and sundries. It appears the revised 1275 footage is accurate on current aerial views. Please revise the north footage accordingly. The East footage did not change. The revised C-102 is attached.
