TYPE OF SUBMISSION	TYPE OF ACTION			
☐ Notice of Intent	☐ Acidize	☐ Deepen	☐ Production (Start/Resume)	☐ Water Shut-Off
☒ Subsequent Report	☐ Alter Casing	☐ Fracture Treat	☐ Reclamation	☐ Well Integrity
☐ Final Abandonment Notice	☐ Casing Repair	☐ New Construction	☐ Recomplete	☒ Other Downhole commingled
	☐ Change Plans	☐ Plug and Abandon	☐ Temporarily Abandon	both zones (PC + Chacra)
	☐ Convert to Injection	☐ Plug Back	☐ Water Disposal	

13. Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

*****See attached daily work reports showing work completed to downhole commingle PC and Chacra perforations that had previously been produced separately. PC had been separated by packer and produced up tubing/casing annulus. Chacra perforations were below the packer and zone was produced up 2-3/8" OD tubing. Production from both zones had been metered separately. Downhole commingled gas is now metered through one meter (Old Chacra meter) and is allocated to each zone as per approved allocation formula and produced up one single string of tubing set at top of Chacra perforations with no packer in the wellbore.*****
