13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

This well was permitted in November 1992 and drilled in March 1993 by Hallwood Petroleum, Inc. It was P&Ad in October 1995. Subsequently, Hallwood's assets were acquired by Chevron U.S.A. Inc. Chevron would now like to re-enter this well utilizing the same wellbore. Water and gas lines are stubbed out on the pad surface so we anticipate no need for surface disturbance of any kind. Chevron would like to request an on-site with the BLM to confirm the administrative process we need to follow. Our hope is to do this as quickly as possible before snow sets in for the winter, to utilize the winter months for processing the necessary paperwork, and to move a rig onto that location in the Spring.
