13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

To minimize deviation due to steep dip, one joint of 9 5/8" 36# J55 surface casing will be set in the 12 1/4" surface hole and cemented to the surface. Then, the 8 3/4" hole through the Menefee and Point Lookout will be drilled with an air hammer. The use of air will eliminate the need for a mud pit and reduce the number of days to drill the well.
