If a Watercourse was Impacted, Describe Fully.*		

Describe Cause of Problem and Remedial Action Taken.* **While removing a conduit on the bottom of the storage tank, a PVC pipe nipple on the drain valve cracked causing glycol to release.**

Describe Area Affected and Cleanup Action Taken.* **Approximately 13.5 BBL of fluid was contained on the concrete skid under the tank and it is estimated that 0.8 BBL of fluid sprayed outside of the containment. The fluid on the containment was removed and the impacted gravel/soil was hydro-excavated. No further action required.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
