13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

In order to avoid the casing of an offset well prior to drilling the San Juan 32-5 Unit #105S as a recomplete, the existing survey of the SHL was redone and showed the footage to be 1681' FSL, 1344' FEL.

The original footage was 1670' FSL, 1340' FEL. This change is due to the availability of updated surveying equipment. Attached is a revised C-102 depicting this change.
