13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

In accordance with Order #DHC-1829-A, it is intended to downhole commingle the W. Lindrith Gallup-Dakota (39189), Blanco MV (72319) and South Blanco Pictured Cliffs (72360). The existing DK/GL perforations are 7599'-7751', the MV perforations are 5501'-5623' and the estimated PC perforations are 3390'-3490'. A CBL will be run from around 5,000' to surface to determine TOC. Once TOC is determined, squeeze holes may be shot and may attempt to circulate cement to surface. Selectively perforate and fracture zone. Clean out to PBTD. Run tubing & put well on production. Recommended allocation will be by the Subtraction method following 60 days of stabilized production. Commingling will not reduce the total remaining production's value. The interst owners are identical for each zone. Rates reported to MNOCD - Aztec for final determination.
