Describe Cause of Problem and Remedial Action Taken.

**Capstone generator malfunctioned possible fuel gas problems with extreme freezing conditions. Transfer pump shut down allowing water in production tank to overfill and released water to secondary containment. Due to frozen ground conditions, most of the water recovered by vac truck. Shut in until pump operational.**

Describe Area Affected and Cleanup Action Taken **No further corrective actions to be taken until site reclaimed during P&A.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
