viji. u										
Describe Cause of Problem and Remedial Action Taken.*										
Due to the condition of the roads, the location was inaccessible and the produced water pit tank overflowed. All fluids were contained inside the bermed area. Upon discovery, no free standing liquids were able to be recovered.										
Describe Area Affected and Cleanup Action Taken.* Plans are to move the pit tank so that the soil beneath the equipment can be removed if										
necessary. Impacted soils will be excavated and transported to a commercial disposal facility. Once the soil is removed, samples will be collected from the excavation and sent to a laboratory for analysis. Upon verification that the samples are below the 100 ppm TPH, the excavation will be backfilled with										
clean soil. A final report (including the lab analyses) will be submitted upon completion of the cleanup work.										
I however contifus that the information given above is two and complete to the heat of my knowledge and understand that museum to NMOCD miles and										
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger										
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability										
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other										
federal, state, or local laws and/or regulations.

Initial Release Reports Submittal

Dear Mr. Powell:

Enclosed are initial Release Notification and Corrective Action (C-141) Form for the recently discovered releases on the Jicarilla 67 #5E and Jicarilla 67 #15 well locations. The excavation of impacted soils will be conducted in the near future and soil samples will be collected. I will follow-up with final reports once the jobs are complete.

If there are any questions or concerns with this submittal, please contact me at 505-324-4131.

Sincerely,

Ed Hasely

Sr. Environmental Engineer

Energen Resources
