NATURE OF RELEASE

Type of Release - Produced water	Volume of Release - approx. 5 BBL	Volume Recovered - none
Source of Release: Hole in fiberglass produced water pit tank	Date and Hour of Occurrence 1/28/08	Date and Hour of Discovery 1/28/08 - 12:30 p.m.
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom? Brandon Powell - OCD - via email Kevin Schneider - BLM - via email	
By Whom? Monica D. Johnson	Date and Hour - 2/11/08 - 3:00 p.m.	RCVD FEB 14 '08
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. OIL CONS. DIV.	
If a Watercourse was Impacted, Describe Fully.*		DIST. 3

Describe Cause of Problem and Remedial Action Taken.* **A spill of an estimated 5 BBL produced water was discovered at the Newsom B #15 on the afternoon of 1-28-08, when upon cleaning soil from the sides of a fiberglass pit tank, saturated soils were encountered. The fiberglass pit tank was removed and a hole in the fiberglass tank was discovered, as well as what appeared to be historic (legacy) staining underneath the pit tank. Based on monitoring of the soil colors and saturation levels during excavation, we are estimating the spill to be approximately 5 BBL, with as much as 12 BBL contributing to the legacy staining. An area approximately 20' x 20' x 10' was excavated beneath the pit tank, and all soils were hauled to Envirotech's commercial landfarm.**

Describe Area Affected and Cleanup Action Taken.* **All spilled fluids remained within a bermed area. The affected soils covered an area approximately 20' x 20' x 10' deep. All impacted soils were excavated and hauled to Envirotech's commercial landfarm for remediation. A new steel pit tank was installed.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
