- 13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

In addition to the BLM 3160-4 MV recompleat report, Chevron Midcontinent, L.P. respectfully submits updated allocation factors for the downhole commingling of the Blanco Mesaverde (72319) and Basin Dakota (71599) pools in accordance with DHC #497AZ. This well was initially and still is commingled downhole with the Blanco Mesaverde (f/5204'-5430') and Basin Dakota (f/ 7278'-7488') in July/August of 2001.

**Rincon 185R MV/DK Allocation Factors**

Blanco Mesaverde (72319)	Gas 40%	Oil 50%	Water 50%
Basin Dakota (71599)	Gas 60%	Oil 50%	Water 50%

The following are isolated tests and volumes on 18/64 choke for each interval from the flowback reports:

Formation	Date 1st Produced	Test Date	Gas Test Volume	%
Dakota	7/27/01	7/28/01	1.5 MMcf	60%
Mesaverde	8/9/01	8/10/01	1 MMcf	40%

Evaluating offset production, the gas rates fall in the mean, and the oil and water rates for each zone come out to be 50%.

This form contains corrected information to update the records from the previously approved 3160-5 of June 2011.

- 14 I hereby certify that the foregoing is true and correct
