CHACRA	258 MCFD	46%		0%
MESAVERDE	302 MCFD	54%		100%

JUSTIFICATION OF ALLOCATION: These percentages are based upon isolated flow tests from the Mesaverde and Dakota formations during completion operations. Oil was not present during flow test operations. However, the Chacra does not produce oil. For that reason, oil is allocated solely to the Mesaverde formation in the event that this formation starts to produce oil at some point in the future.
