If a Watercourse was impacted, describe fully (Attach additional sheets if necessary) na		

Describe cause of problem and remedial action taken. (attach additional sheets if necessary)

Tank overflowed its contents. Three causes #1) Level Limit Control Switch failed #2) The #1 Water transfer pump would not start. (Electrical problem in panel control box). #3) The #2 Water transfer pump shut down on low suction pressure (air-locked). No water left the diked area around tank nor the lease.

Describe area affected and cleanup action taken Attach additional sheets if necessary)

320 BBLs spilled and 100% recovered and pumped back into storage tank.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment In addition, NMOCD acceptance of a C-141 report does not relieve the Operator of responsibility for compliance with any other federal, state, or local laws and/or regulations
