Dump valve on oil water separator malfunctioned causing the pit tank to overflow. Free liquid was recovered from pit tank and approximately 6-8 cu. yd. of oil and water contaminated soil were excavated and landfarmed onsite.

Describe Area Affected and Cleanup Action Taken. (Attach Additional Sheets If Necessary)

Area surrounding pit tank and flow path traveling off location for 125 yds on hard packed access road, rock, and to a limited extent sandy soils in a gully. Free liquid recovered from pit tank and approximately 6-8 cu.yd. of oil and water contaminated soils and landfarmed on location. Contaminated soil excavated based on visible staining.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
