NATURE OF RELEASE

Type of Release:	Oil	Volume of Release:	15 bbls.	Volume Recovered:	0 bbls.
Source of Release:	Pit Tank	Date and Hour of Occurrence:	4/18/00	Date and Hour of Discovery:	4/18/00
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If Yes, To Whom?	Charlie Perrin/Denny Foust		
By Whom?	Ed Hasely	Date and Hour:	4/20/00 11:15:00 AM		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	0		

If a Watercourse was Impacted, Describe Fully. (Attach Additional Sheets If Necessary)

NA

Describe Cause of Problem and Remedial Action Taken. (Attach Additional Sheets If Necessary)

Valve was left open while draining water from condensate tank. The steel pit tank overflowed. Fluids seeped through the earthen berms and traveled off location.

Describe Area Affected and Cleanup Action Taken. (Attach Additional Sheets If Necessary)

The fluids traveled off location and into a rocky/sandy dry drainage for approximately 1/4 mile (averaged less than 2 feet wide). Impacted soils on the well pad and in the drainage were excavated and landfirmed on location. Small puddles of free liquids in the drainage were removed using absorbent pads. Some of the impacted rock areas and vegetation were steam cleaned and absorbent booms were used to catch any hydrocarbons. A biodegradable absorbent (Oil Snapper) was then raked into the soils. Mr. Neil McBride (BLM) inspected the cleanup efforts on 4/21 and 4/24.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
