NATURE OF RELEASE

Type of Release:	Crude oil and produced water	Volume of Release:	20 bbls.	Volume Recovered:	0 bbls.
Source of Release:	Temporary produced water tank	Date and Hour of Occurrence:	11/27/2000 1:30:00 PM	Date and Hour of Discovery:	11/27/2000 1:30:00 PM
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If Yes, To Whom? Denny Foust			
By Whom?	Ed Hasely	Date and Hour: 11/27/2000 2:00:00 P			
Was a Watercourse Reached?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	If YES, Volume Impacting the Watercourse. 20			

If a Watercourse was Impacted, Describe Fully. (Attach Additional Sheets If Necessary)

Dry ephemeral wash. The spill did not impact any water, but did enter a dry ephemeral wash.

Describe Cause of Problem and Remedial Action Taken. (Attach Additional Sheets If Necessary)

Produced water from well over flowed an amount of oil present in a temporary set 500 bbl produced water tank (laydown tank). Excavation of spill flow path down to no visible staining in soil and sediment.

Denny Foust (NMOCD) inspected the spill area on 11/27/00.

Describe Area Affected and Cleanup Action Taken. (Attach Additional Sheets If Necessary)

Spilled oil followed topography off location toward dry wash (3 feet x 75 yards flow path) and (3ft x 300 yards flow path) down wash. Depth of spill varied from film to 0.5 inches thick along flow path. Viscosity of oil and frozen soil conditions prevented vertical migration. Impacted soils (approximately 130 cubic yards) were removed and landfarmed on location. "Oil Hawg", a natural organic fiber containing indigenous microorganisms, was also mixed with the soils in certain areas to absorb any leftover hydrocarbons and promote bioremediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
