13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Thompson Engineering and Production Corp. abandoned the Menefee formation by setting a CIBP at 1160' KB and placing 6 sx (7.02 cu.ft.) of neat cement (approximately 53') on top of the CIBP. Based on the open hole logs and offset production, this wellbore would be capable of producing economic quantities of gas from the Fruitland Coal formation if a commercial pipeline was available. TEPC requests permission to leave this well in a SI status until a pipeline is available.
