13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The Tsah Tsah 3 #3 is currently shut-in due to low productivity. Caerus Southern Rockies LLC had planned to restore it's production by utilizing a "Caol Stim" process. Current economics can not justify that project at this time. Because Caerus still believes this is a viable project, Caerus Southern Rockies LLC requests that this well be allowed to remain shut-in for 1 year. A braden head test was recently performed in accordance with New Mexico Oil Conservation Division indicated no communication with the production casing.
