13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

In accordance the Case 12346, Order # R-11363, it is intended to downhole commingle the Basin DK (71599) and Gallegos Gallup Associated (26980). The existing DK perforations are 6282'-6382'. A CBL will be run from 5900' to surface to determine TOC. The estimated Gallup perforations are 5580'-5570', 5550'-5530', 5500'-5484', 5440'-5430', and 5420'-5410' at 3 spf to be fractured in 2 stages. Each stage will be individually flow tested for an estimated 30 days. Recommended allocation will be by Subtraction method following 60 days of stabilized production. Commingling will not reduce the total remaining production's value. The interest owners are identical for each zone. Rates reported to NMOCD -Aztec for final determination.
