3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof if the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

McElvain Oil & Gas Properties, Inc. moved this location due to discovery of Enterprise pipeline after one call. A new C-102 and Wellsite Layout are attached for reference. A new cultural buffer zone has been surveyed and an amended report is forthcoming. The drilling program previously approved will not change. The Surface Use Program will be amended as follows:
Brush and the few trees will be pushed to corner 3 and walked down for use as fill. A topsoil berm will be pushed up along side 5-6 to act as a drainage diversion while well is drilled and completed. The topsoil will be spread over the pit area when pit is reclaimed and a permanent drainage diversion ditch cut paralleling side 5-6, draining south. Corner 6 will be rounded into location to prevent cut into Enterprise right of way. A drainage diversion ditch will be cut, above the cut slope, along side 2-6, draining to the east. All other cut/fill slopes will be outside staked perimeter. The new access road has been re-routed to come off the northwest corner of the existing Dakota location to prevent damage to the existing wellhead cathodic protection system.
