If well is directionally drilled, give subsurface locations and measured and true vertical depth for all markers and zones pertinent to this work.)*

The above referenced well has not been producing due to the need for a rod pump replacement. Roddy Production intends to move in a well servicing rig, replace the rod pump, and return the well to production by approximately July 25, 2005. This action has been delayed until this time, due to inclement weather and equipment availability. This plan of action is proposed to address Item 2 of the letter dated June 16, 2005, from Mr. Steve Mason, Bureau of Land Management, Farmington Field Office.
