**13. Describe Proposed or Completed Operations**

Due to geologists wanting to test the lower Dakota on this well, it is intended to change the depth of this well from 6758' to 7003' and to eliminate 7" intermediate casing and run 4 1/2" casing to TD and mud drill (hole size to be 7 7/8") and cement with two stages of cement.

Verbal approval from Adrienne Brumley, BLM, was obtained on 8/23/05 to place centralizers every fourth joint from TD to base of Ojo Alamo @ 1018', two turbolizers, then standard centralizers every fourth joint up to the base of the surface pipe.

**14. I hereby certify that the foregoing is true and correct.**

Signed Joni Clark Title Sr. Regulatory Specialist Date 8/23/05
