San Juan Resources of Colorado request approval to downhole commingle the production from the Basin Dakota (71599) and the Blanco Mesa Verde (72319) formations. These two pools were pre-approved for downhole commingling in order R-11363. The Dakota was perforated from 6388' to 6509' and the Mesa Verde was perforated from 4203' to 4284' KB. Based on the attached cumulative production from the two pools in the nine adjacent sections, San Juan Resources proposes to allocate 78.3.7% of the gas and 94.1% of the oil to the Dakota formation and 21.7% of the gas and 5.9% of the oil to the Mesa Verde formation. San Juan Resources of Colorado believes that the downhole commingling will not reduce the value of the total remaining production. The ownership in both formations is common in this well and the downhole commingling has been approved by all of the revenue owners of the well.
