Describe Cause of Problem and Remedial Action Taken.\*  
Area measurement technician was notified by producer of gas leaking from an orifice flange and stained soil around meter run. Technician notified supervisor and went to the location where he found a gasket in the orifice flange damaged. He performed lock out, tag out (LOTO) and replaced the gaskets.

Describe Area Affected and Cleanup Action Taken.\*  
Affected area of stained soil was estimated at approximately 15 feet X 15feet X 1-6 inches deep. Cleanup using dig and haul techniques occurred on 12/13/2012. Third party environmental contractor provided cleanup guidance and confirmation sampling of the impacted soil area that was removed and backfilled with clean material. A third party corrective action report summarizing these activities will be submitted with a "final" c-141 report.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
