Elm Ridge Exploration Company, LLC tested the Pictured Cliffs formation. The test showed that the formation will produce an effcant amount of gas to keep the well on production. We tested the well on 6-7-05 for a 24 hour period, in that time the well produced about 17 MCF with 82 PSI on the tubing and 240 PSI on the casing. We would like to retract our original notice of intent to plug and abandon.
