13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion. No workover pits to be used. Will use above ground steel frac tanks during the workover.

Dominion requests permission to commingle existing production downhole on the Otero Chacra (Perfs 3070'-3082', 3145'-3156') and Blanco Mesa Verde (Perfs 4472'-4496', 4534'-4546', 4578'-4586') formations. The existing 1-1/4" and 1-1/2" tubing and Baker packer will be removed. 2-3/8" tubing will be set at 4600', and a pumping unit, rods and pump installed.

The Otero-Chacra (82329) and Blanco-Mesaverde (72319) Pools are pre-approved for downhole commingling per NMOCD order R-11363. The working, overriding and royalty interest owners in the proposed commingled pools are identical, therefore no notification of this application needs to be submitted via certified mail (return receipt).

Dominion recommends current production percentage as the basis for production allocation. Otero-Chacra 32% and Blanco-Mesa Verde 68%. Commingling production downhole in the subject well from the proposed pools will not reduce the value of the remaining production.

Note: This has also been requested on BLM form 3160-5.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
NO PIT TO BE USED. WILL USE ABOVE GROUND STEEL FRAC TANKS.
