13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once Testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

ConocoPhillips as a good practice resurveys all our wells after the drilling to ensure that the location footages and Latitudes and Longitudes (Lat/Long) associated with the well are correct. The subject well's footages as well as Lat/Longs were wrong on the previous survey so a new one is being supplied and corrections need to be made (see attached).

The correct footages are **UL N (SESW), 747' FSL and 1702' FWL**. The corrected Lat/Long are **36.540463°N and 107.422080°W (NAD83)**. Please make note of these changes.
