13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Logos Operating, LLC politely requests a pit closure extension of an additional 30 days to allow for the chloride levels to be reduced by blending clean soil with the pit materials (3:1 ratio). The pit closure extension ends on 7/2/2013 and this request would extend the closure date to 8/2/2013. It is likely that the reduction in chloride levels will be reached before the end of the 30 day extension, and if that is the case, Logos will accelerate the pit closure accordingly.
