Conditions of Approval:

Notify NMOCD 24hrs prior to beginning operations.

The last MIT conducted on October 2008 for this well was a failure. Since the failure, no reports of subsequent work have been received.

Because this failure could have been a result of defective or corroded casing an MIT is required to be performed within 30 days of this approval to verify the integrity of the casing. No production can take place until the MIT is performed.

This well was drilled as an injection well therefore a C-104 for production is required; File a current C104 and completion report for review and approval before returning to production.
