API# 30-039-27413

Mr. Perrin:

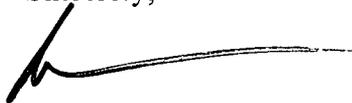

Energen Resources finished a pay add and down hole commingling operations on the subject well, in accordance with the approved Notice of Intent.

Prior to commingling operations, the Blanco-Mesaverde was producing at a stabilized rate of about 50 MCFPD and less than 1/4 BOPD. The Gavilan PC was added in March 2013. The well has stabilized at a rate of about 250 MCPD and about 1/2 BOPD. The following allocation is recommended (see attached production plot):

	<u>Gas</u>	<u>Oil</u>
Blanco-Mesaverde	20%	10%
Gavilan PC	80%	90%

If additional information is needed, please contact me at 505-325-6800.

Sincerely,

Adam Klem
District Engineer
