13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 must be filed once Testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

11/20/13 - Burlington Resources contacted BLM for permission to change an approved procedure for plugging. The approved procedure includes a PC Plug @ 1842'-1892' and a Fruitland Coal Plug @ 1639'-1829'. Consequently, there is only 13' between the top of the PC perfs and the bottom of the FC perfs. Burlington Resources requested approval to eliminate plug 1 between the PC & FC and set plug 2 50' above the top FC perf. Burlington Resources has common ownership of both the PC & FC Zones and has an approved downhole commingle order - DHC 2085AZ for both zones. Pressures in both zones are the same and Geology/Gas is similiar in both zones. Brandon Powell with NMOCDD was also contacted and he gave verbal approval to eliminate the PC plug.
11/21/13 - Steve Mason with BLM approved a waiver to eliminate the PC Plug due to the close proximity of the perforations in the PC & FC zones.
