3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The referenced well was shut in during March 2004 due to the closure of the helium plant that processed the produced gas stream. The ownership of the helium plant has changed and is now under new management. The plant is currently being repaired and upgraded. Recommissioning should take approximately three months. The plant and helium wells should be brought back on-line during the First Quarter 2006.

It is respectfully requested that the deadline for permanent abandonment of the referenced well be extended to September 30, 2006 to allow for the recommissioning of the helium plant. The well is currently completed in a manner that does not pose environmental concern. Should conditions change, the well will be permanently abandoned as soon as possible.
