13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

WPX Energy requests authorization to flare this well due to a temporary emergency situation. On or about 6/9/14 the well was shut in so that frac activity could take place at the Chaco 2306-19M #190H. It has been shut in since that time. We expect the activity on the #190H to be completed or about 6/16/14, at which time we would like to put the #191H back to flare to finish cleaning out nitrogen.

The Chaco 2306-19M #190H has an average 415 MCFD and we should see pipeline quality gas by 7/11/14.

Authorization granted until necessary clean-up of the 191H occurs or until 7/11/14, whichever occurs first.

Approved pursuant to
NTL4A, Part III A
