**NATURE OF RELEASE**

Type of Release: Natural Gas	Volume of Release: 155 MCF	Volume Recovered: none
Source of Release: 2 inch nipple – suction scrubber	Date and Hour of Occurrence: 9/27/14 – 9 pm to 10/7/14 – 12 pm	Date and Hour of Discovery: 10/7/14 – 12 pm
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

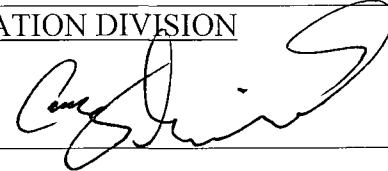

Describe Cause of Problem and Remedial Action Taken.\*

Operations technician responded to compressor down and found gas leaking from what he thought was a crack in 2 inch nipple threaded feeding into suction scrubber. He isolated the compressor and flagged the leak. Subsequent site visit found that the threads appeared to be backed off from threaded connection allowing for gas to leak by. The well is shut-in awaiting investigation and repairs.

Describe Area Affected and Cleanup Action Taken.\*

Natural gas dissipated to atmosphere so no clean-up action possible.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
