Describe Cause of Problem and Remedial Action Taken.*
Dump valve hung open allowing 2044 mcf of natural gas and .1gallons of paraffin to be released. The well was immediately shut-in upon discovery and the dump valve was repaired.

Describe Area Affected and Cleanup Action Taken.*
No further remediation will be taken.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
