JUSTIFICATION OF ALLOCATION: It is recommended that the allocation for the Reid 13 be adjusted based on an analysis of offset performance. The direct offset Fruitland Coal and Pictured Cliffs producers were averaged to determine a reasonable current allocation. Producers for the Fruitland Coal are the McClanahan 21, Reid Com 706, and Federal 17 1. These wells are averaging 123 MCFD. Although these wells are not direct offset producers, they are the closest active Fruitland Coal producers that are not commingled. The direct offset producers for the Pictured Cliffs are the Reid 15, Reid 4, Reid 6, and Reid 17. These wells are currently averaging 74 MCFD. Only active producers were used for these calculations. The Reid 10, Reid 16R, and Reid 7R were not used as they are commingled wells.
