FORMATION	GAS	PERCENT	CONDENSATE	PERCENT																						
Fruitland Coal		67%		67%																						
Pictured Cliffs		33%		33%																						
JUSTIFICATION OF ALLOCATION: These percentages are based upon a previously submitted allocation that calculated percentages based on a decline formula. This well is currently experiencing some down-hole problems that have severely reduced overall well production. The above percentages are from the period prior to the current production problems (April 2004). It is recommended that they be fixed at the above levels going forward.
