JUSTIFICATION OF ALLOCATION: It is recommended that the allocation for the Sanchez A Com 2 should be adjusted based on an analysis of offset performance. The direct offset Fruitland Coal and Pictured Cliffs producers were averaged to determine a reasonable current allocation. Producers for the Fruitland Coal are the Federal 17-1, and Federal 28-9-9 1. These wells are averaging 95 MCFD. The direct offset producers for the Pictured Cliffs are the Johnston LS 4, Johnston LS 8, Wright Com 1R, and State 16-2. These wells are currently averaging 31 MCFD. Only active producers were used for these calculations. The Sanchez A Com 1 was not used as it is a commingled well.
