13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well was commingled in the Blanco Mesaverde (72319) and Otero Chacra (82329) as per DHC-427AZ in ~~December 2000~~ ^{June 2001}.

We propose this gas & oil allocation and believe it to be reasonably accurate. This gas allocation is based on the average gas production from this well before and after the workover, which opened the Chacra to production. Since the Chacra formation does not make any oil, all oil is allocated to the Mesaverde. See the attached calculation sheet and production curve. Notice has been filed concurrently on form C-103 with the State.

GAS: CHACRA	24%	OIL: CHACRA	0%
GAS: MESAVERDE	76%	OIL: MESAVERDE	100%
