FORMATION	GAS	PERCENT	CONDENSATE	PERCENT
Fruitland Coal		66%		66%
Pictured Cliffs		34%		34%

JUSTIFICATION OF ALLOCATION: It is recommended that the allocation for the Shiotani Fed 400 be adjusted based on an analysis of offset performance. The direct offset Fruitland Coal and Pictured Cliffs producers were averaged to determine a reasonable current allocation. Producers for the Fruitland Coal are the ROPCO Federal FC 5 2, Tak Well 1, Gallegos Canyon Unit 383, and Gallegos Canyon Unit 388. These wells are averaging 154 MCFD. The direct offset producers for the Pictured Cliffs are the Gallegos Canyon Unit 581, Gallegos Canyon Unit 504, Gallegos Canyon Unit 537, and McIlroy 1R. These wells are currently averaging 78 MCFD. Only active producers were used for these calculations. The Shiotani Federal 500 was not used, as it is a commingled well.
