SQZ off Fruitland Sand in 1996

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.

On July 24, 1996, we obtained approval to convert the subject well from a dual well (Perfs in Fruitland but never produced) to a single well by squeezing off the Fruitland perforations. The well work was performed in October/November 1996, however, the filing of the appropriate form detailing the well work was not submitted. This is being submitted to correct that oversight.
