BP America Production Company respectfully requests to re-complete into the Basin Fruitland formation & downhole commingle production with the existing West Kutz Pictured Cliffs in the subject well.

The West Kutz Pictured Cliffs (79680) & Basin Fruitland Coal (71629) are Pre-Approved Pools for DHC per NMOCD Case No. 12520; Order No. R-11567 effective 04/26/2001. Although the interest owners are not identical between these two pools, this same order established approval for subsequent applications for DHC of production in wellbores within the GCU without notice to the unit interest owners. Therefore, no additional notification is required prior to DHC approval.

Production is proposed to be allocated based on the subtraction method using the West Kutz Pictured Cliffs projected future decline. That production will serve as a base for production subtracted from the total production for the commingled well. The balance of the production will be attributed to the Basin Fruitland Coal.

Commingling production downhole in the subject well from the proposed pools will not reduce the value of the total remaining production.

Please see attached DHC procedure, wellbore schematics & C-102 plats.
