(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Currently, the Rosa #168A is plugged back to 2900'. In the fall of 2003, Williams Production drilled two horizontal wells (Rosa #361 16-31N-5W and Rosa #371 13-31N-5W. The wells are producing 590 and 260 mcf/d, respectively) Given the initial positive results from these two horizontal wells, Williams proposes to monitor both wells through June 2004 to determine if the Rosa #168A might be a viable recompletion candidate for a horizontal Fruitland Coal well.

14. I hereby certify that the foregoing is true and correct
