3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The Engleberry #1 has 5 1/2" casing in the hole with a PBID of 1267. No perforations have been placed in the 5 1/2" casing. GeoMet proposes to run a CBL to determine the cement top since no cement returns were noticed during the job. The results of the CBL will determine a course of action to satisfy BLM P&A requirements. The BLM Farmington office will be notified upon obtaining the CBL. The following P&A procedures will be carried out after BLM approval of the CBL.

RU workover unit RIH with end of tubing to 1000'. Place 100' cement plug from 900-1000'. Pull end of tubing to 661'. Place 100 ft. plug from 561-661'. Pull end of tubing to 184'. Cement from 184' to surface. Cut casing off 3 ft. below ground level and place a 4" x 10 ft. dry hole marker into cement top.

The location will be restored to conditions as detailed in the BLM approved APD. The BLM Farmington office will be notified upon restoration activities to perform final inspection.
