If a Watercourse was Impacted, Describe Fully.*
N/A

OIL CONS. DIV DIST. 3
DEC 18 2017

Describe Cause of Problem and Remedial Action Taken.*
A broken valve on tank caused the leak. All fluids were contained inside the berm/dike, and all free standing fluids were picked-up with a vac truck. The affected area was fenced in order to prevent livestock from entering the area.

Describe Area Affected and Cleanup Action Taken.*
On 12/12/17, a vacuum truck was utilized to remove all free standing fluids. A roustabout crew will be cleaning-up and remediating the area. Any oily soil will be properly disposed.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: San Isidro 7-11 Initial C-141 Conditions of Approval

Good afternoon Matt,

The initial C-141 for the San Isidro 7-11 has been approved with the following conditions of approval.

- Site Closure Ranking is 10 based on Surface water within 1000' of release. Closure Site will be 1000 mg/kg Total Petroleum Hydrocarbons, 50 mg/kg Total BTEX and 10 mg/kg Benzene.
- Provide OCD and Surface Owner 24-48 hours of sampling events.
- Full delineation of release must be completed by 1-20-2017.

Please let me know if you have any questions.

Thank you,
Vanessa Fields
