Four Star Oil and Gas requests permission to downhole commingle the referenced well.

To support the commingling Four Star submits the following:

- Commingling is allowed for the two referenced in Division Orders #11363
- The pools to be commingled are the Basin (Dakota) and the Otero (Chacra)
- The perforations are at 6422'-6565' (Dakota) and 2841'-3121' (Chacra)
- Production will be allocated based on the subtractive method, because the Dakota formation has been shut-in.
- The commingling will not reduce the value of the total remaining production.
- Ownership the same in both pools.
