13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The MKL 14-8 is currently shut-in after having tested at excessive water rates from the Fruitland Coal for the well to be currently commercial. The possibility of finding a suitable disposal candidate for use jointly with Caulkins Oil was considered, but a workable situation was not found. DEPI still believes that the Fruitland Coal can be made commercially viable if the water production problem can be solved. DEPI requests six months to investigate other alternatives for disposing of the water, or determining if the water is coming from the Fruitland Coal, or might be from older area wells that don't have cement over the Fruitland.

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #23209 verified by the BLM Well Information System
For DOMINION EXPL & PROD INC, sent to the Farmington
Committed to AFMSS for processing by Steve Mason on 06/13/2003 (03SXM0946SE)
