13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Coleman Oil & Gas, Inc requests approval to finish plugging the JW Goddard #3. Coleman Oil & Gas has been monitoring shut in braden head pressure build ups and has noticed the build pressure has been decreasing monthly. Coleman recommends perforating 5 1/2" production casing @ 450 feet. Rig up pump and attempt pump in test. Pump in test @ 545 feet previously failed, unable to pump into. RIH with Tubing to approximately 620 feet and place cement plug from 620 feet to surface inside 5 1/2" casing with 38 sacks cement. POOH with tubing, cut off surface equipment and top off with cement.

See the attached Braden Head pressure build-ups.
